

Presented to the L. H. Bailey Hortorium by the Missouri Botanical Garden, 1972.

INTRODUCTION.

HAYWARDS HEATH.

Sussex. 1914.

In asking your acceptance of our 1914 Catalogue, we venture to thank you and our very numerous patrons for their valued and continued support, and to solicit recommendations to all interested in Orchid culture.

We are also sincerely grateful to the numerous clients who kindly recommend our Firm, and we shall at all times be pleased to post a copy of our Catalogue to any friend of a client on receipt of name and address.

We again call attention to the fact that our stock in every department is in splendid condition, and is even finer and better than ever. We are also continually flowering many new and interesting hybrids of our own raising, as well as acquiring many rare and choice Orchids from other sources; we therefore invite correspondence and further enquiries.

We also cordially invite any one interested in Orchids to pay a visit to our Nurseries, where a good display of flowers in season may always be admired. A conveyance will meet visitors upon intimation being given. Railway Station, Haywards Heath (L. B. & S. C. Railway) from Victoria and London Bridge Stations.

All plants in this list are guaranteed true to name, but should clients upon receipt of plants be in any way dissatisfied, they may be returned at once. Should any plant not flower within a reasonable degree of the description or of a painting of such flower, the purchase money shall be refunded if desired, with 5% added interest, and no further claim admitted.

PAINTINGS. We employ upon our permanent staff a qualified and experienced Artist, and we shall be pleased to undertake the painting of any Orchid flower or plant at a reasonable charge, the work being beautifully and accurately finished to the most minute detail. Specimens of work may be seen on application.

ORCHID GROWERS and ASSISTANTS. Having at all times competent men in our Establishment and upon our books, we shall be pleased to render assistance to any of our clients who may require a reliable and practical man of proved ability and integrity.

ADVICE. We shall be pleased to instruct one of our representatives to wait upon any one interested in Orchids and desirous of advice upon their cultivation, selection, etc., also upon the erection of new houses, or the adaptability of existing structures to Orchid-growing requirements.

Telegraphic Address: Charlesworths, Haywards Heath.

Telephone No. 50, Haywards Heath.

CONTINENTAL BRANCH: Rue Gerard, BRUSSELS.

Telegraphic Address: "Bohnhof, Brussels."

Representative: Mr. E. Bohnhof, 73, Rue Gerard, Brussels.

PHYTOPHILINE & VITIPHILINE.

THE LATEST WORD IN "INSECTICIDES."

Non-Poisonous and Free from Nicotine, Aether, Alcohol and Arsenic.

It was with very genuine pleasure that we were able to introduce to the BRITISH HORTICULTURAL WORLD, in the New Year, an Insecticide which we then stated and still repeat, will prove a BOON TO HORTICULTURISTS.

Having used it ourselves and thoroughly tested its capabilities, we have no hesitation in recommending it as THE SAFEST, MOST EFFECTIVE, as well as THE MOST ECONOMICAL INSECTICIDE that has yet been introduced to the Orchid-growing public. Having no Nicotine in its composition is sufficient in itself to recommend it to most Gentlemen and Gardeners having a regard for their empioyees and assistants, as well as their plants. Phytophiline is composed of several well-known ingredients, scientifically prepared and compounded in a very concentrated form, producing an Insecticide which is perfectly harmless to the person using it, but absolutely deadly to all Insect pests when mixed with water in the correct proportions for killing each specific Insect, and used as a spraying or dipping compound.

We feel that we cannot say too much in recommending Phytophiline to all Orchid Amateurs and cultivators; in this we are greatly encouraged by the many grateful and flattering letters which we have already received from some of the largest and most importal Growers who have given it a trial.

When we say that, since using PHYTOPHILINE—now nearly two years—we have been able to dispense with the ineffective and dangerous practice of Fumigation throughout our Establishments, it should convince many of its merits. It is a very well-known fact to all observant Orchid Growers, that fumigating with the very best of the vaporisers sold for the purpose, is a waste of time, patience and money, if trying to exterminate either Thrips or Scale (the Orchid growers two worst enemies). The Thrips very quickly make their way down the axis of the leaves of the new growth, where they are perfectly safe from the effects of the Fumigant. Scale having a thick shield-like coverlng is perfectly invulnerable to fumigating also.

PHYTOPHILINE works in a different way. It does not attempt to poison these insects, but when used in a fine sprayer producing a mist-like vapour, it destroys the Insect by stopping up its breathing pores. Death is not always instantaneous however. Thrips especially may linger on until the next day, but eventually succumb to one application of Phytophiline at the strength of one part to sixty parts of water.

Another Important point in its recommendation is that it can be used with perfect safety on the most tender and small Orchid seedlings. Flower spikes in bud, and fully developed flowers may be dipped in a solution strong enough to kill Thrips, without injury to flowers or buds.

To facilitate economy, this Insecticide has been made in three Standards, and named:—
PHYTOPHILINE NO. 1. VITIPHILINE No. 2. VITIPH

VITIPHILINE No. 3.

Phytophiline No. 1 should be used to destroy Black and Green Aphis, Black, White and Yellow Thrips, Brown and White Scale, White Fly, Woolly Aphis or American Blight, Caterpillars and White Ants.

Vitiphlline No. 2 is recommended to be used on very tender plants, to destroy Red or Grey Spider, White Aphis or Mealy Bug.

Vitiphillne No. 3. Can be used for less tender plants to destroy Red or Grey Spider, White Aphis or Mealy Bug, Fungi on Palms, etc., Mildew or Rust on Roses, Peaches, Chrysanthemums, etc.

Directions for use are given on each tin.

Prices as follows:-

\$\frac{1}{4}\text{-pint, 1/0.} \quad \frac{1}{2}\text{-pint, 2/0.} \quad \text{1 pint, 3/0.} \quad \text{2 pints, 5/0.} \quad \text{9 pints, 21/0.}

WHY USE A SYRINGE?

WHEN FOR A FEW SHILLINGS MORE, EITHER OF THESE

PNEUMATIC SPRAYERS

of the time.

tedious to handie.

will do
(1) Ten times the work in a fraction

(2) Will do it more completely, more thoroughly, and with little or no waste of fluid.

(3) Is as simple to use, and FAR less

Type D.

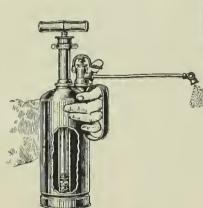

Type D.—4 pints. "Hand Sprayer de Luxe." In VIREX BRASS AL-LOY, strong and light, complete with very powerful self-contained pump, automatic valve giving instant control of spray. The most perfect hand sprayer made 27/6

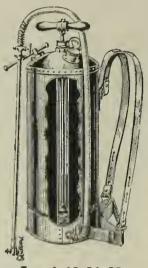

Type D Sprayer.

NO OUTSIDE PUMP TO GET LOST OR MISLAID.
